Trunk Inside	\$75
Disassembled car	\$1350
Wheel	\$25

Paint/Primer will not stick to soda. The car must be washed thoroughly before preparing the surface for paint. Hot water, dish soap and water are both acceptable methods of washing the car. A garden hose and sponge wash is better than a pressure washer.

This should be done as close to the time of paint as possible to ensure a great finish. A Self Etching Primer is the next step after washing.

**Strip your car.
Not your bank account.**

SODA BLASTER SALES

We offer the easiest, safest and most affordable paint removal solution available today. (800) 865-6595

WE ARE ECO-FRIENDLY

We use FDA-approved, water-soluble, non-destructive sodium bicarbonate to eliminate paint from a variety of surfaces.

Our non-toxic, non-destructive process enables us to return the car back to the original condition of the factory metal.

Sodium bicarbonate (baking soda) is ideal because it eliminates old paints, primers and body fillers without generating heat, warping metal or pitting the surface.

WE ARE MOBILE

We can complete most jobs in under one day. Because we're mobile, we can serve the entire region and respond to your needs instantly.

WE ARE EXPERIENCED

Soda Blaster Sales delivers superior service on-time and within budget. Our contractors are experienced and certified, so you can trust your next project with us.

Say good-bye to expensive, frustrating and time-consuming options.

Believe it or not, you don't need to spend countless hours masking glass, removing rubber seals and securing chrome.

Unlike other options, soda blasting doesn't get trapped behind the frame, at the bottom of the doors or hidden underneath the hood.

All you have to do after we blast is wash with soap and water and all traces of soda will disappear!

Because soda blasting takes a third of the time compared to conventional and potentially damaging methods of paint stripping, we save you time and money!

Call us at (800) 865-6595, or e-mail tonys@sodablaster.com today for more information.

Get to the "After" Faster...

We are a mobile solution for your restoration, cleaning and paint stripping needs. Call us for a demonstration and customized price quote.
