Safe and easy Paint Removal

No Need to pre-wash the surfaces. SodaBlasting cleans as it strips paint and grease.

SodaClean Maintenance Plus blast media can be dissolved in fresh water and is actually beneficial to waste water treatment systems.

SodaClean Maintenance Plus is not toxic via ingestion, inhalation or dermal contact, nor is it a skin or eye irritant as defined by EPA and OSHA. Any risk is primarily the contaminate removed during the blasting process.

Other methods can be dirty, loading and embedding the surface with grease, oil, tar, & abrasive particles while removing paint.

SodaBlasting strips the paint, cleans and cuts grease in one step, saving you time and money.

You can be ready to apply that new coat of paint in a matter of hours, meaning your equipment can be “new again” in no time.

Not going to paint right away? Not a problem... just don't wash it until you are ready to paint. The tiny soda particles left on the equipment will protect the surface. When you are ready, simply wash with dish detergent and water.

Soda Blaster Sales, a Missouri based company is pleased to announce that it is now offering a more economical, safer way to remove paint from your equipment and heavy machinery.
